
CODESPRINT 2026 GUIDELINES

8 Hours National Level Hackathon

Objective

Transform a real-world problem into a working prototype within 8 hours by applying innovation, technical skills, teamwork, and presentation abilities.

Team Formation

- Team Size: 3–5 members
- Mandatory: At least one female member in every team.
- Cross-department teams are encouraged.
- Every member should actively contribute.

Problem Statement Allocation

Each team will be assigned ***one problem statement*** through a random allocation process. Teams must analyze the problem, identify existing solutions, propose an innovative approach, and build a working prototype within the hackathon duration.

Sample Problem Statement:

Field	Description
Problem ID	AI-EDU-001
Technology Domain	Generative AI, LLMs, NLP
Industry Domain	Education
Difficulty Level	Medium
Suggested Tech Stack	Frontend - React / Angular Backend - Python (Flask/FastAPI) Database - PostgreSQL / MongoDB AI Tools - OpenAI / Llama, LangChain, Hugging Face
Expected Deliverable	Web application with AI-powered features

Problem Statement - College students often struggle to prepare for campus placements because they receive generic learning resources instead of personalized guidance. Existing platforms provide static content but fail to generate customized interview questions, learning plans, and feedback based on a student's skill level.

Build an AI-powered Placement Preparation Assistant that analyzes a student's profile and generates personalized learning roadmaps, mock interview questions, coding practice recommendations, resume improvement suggestions, and interview feedback using LLMs.

Teams may receive problem statements from any of the following technology areas:

Category	Technologies
Artificial Intelligence	AI, Machine Learning, Deep Learning
AI & Language	NLP, LLMs, Generative AI, AI Agents
Computer Vision	Image Processing, Object Detection, OCR
Software Development	Web Development, Android Development
Security	Cyber Security
Data	Data Analytics, Business Intelligence
Cloud	Cloud Computing, DevOps
Emerging Technologies	IoT, Blockchain, Automation

Problem statements will address real-world challenges from diverse sectors.

Domain	Example Applications
--------	----------------------

Healthcare	Patient monitoring, diagnosis support, appointment systems
Agriculture	Crop disease detection, smart irrigation, yield prediction
Education	Personalized learning, attendance analytics, career guidance
E-Commerce	Product recommendation, inventory management, chatbot
Finance	Fraud detection, expense tracking, loan risk analysis
Transportation	Route optimization, traffic prediction, smart parking
Environment	Waste management, pollution monitoring, energy optimization
Smart Cities	Smart governance, citizen services, public safety
Manufacturing	Predictive maintenance, quality inspection
Logistics	Delivery optimization, warehouse automation
Food & Hospitality	Restaurant management, food waste reduction
Government	Digital public services, grievance management
Social Impact	Accessibility, disaster response, community welfare
Retail	Customer analytics, demand forecasting
Sports & Entertainment	Performance analytics, fan engagement

Note: Teams are encouraged to think beyond implementation. The most successful solutions identify gaps in existing systems, introduce innovative features, and deliver a practical prototype with real-world impact.

Hackathon Timeline & Evaluation Criteria

Evaluation Stage	Timeline 9am to 5pm	Evaluation Criteria	Score(1-5) 5 - Exceptional, 4 - Strong 3 - Satisfactory, 2 - Developing 1 - Needs Significant Improvement
Stage 1 - Discover & Innovate Review	9.00am - 10.00am	Problem Understanding and Innovation & Creativity	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
		Mentors will evaluate whether the team: Clearly understands the problem statement and target users. Identifies gaps in existing solutions through research. Proposes a unique and practical solution. Defines clear features and expected impact. Justifies why their solution is better or different.	
Stage 2 - Build Progress Review	10:00am - 12:00pm	Technical Implementation and Prototype Completion	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5
		Mentors will evaluate whether the team: Chooses an appropriate technology stack and architecture. Makes consistent development progress every hour. Builds a functional prototype with core features. Writes clean, organized, and maintainable code. Successfully integrates required technologies, APIs, or AI models.	

Stage 3 - Prototype Quality Review	12:00pm - 3:00pm	UI/UX and Teamwork	☐1 ☐2 ☐3 ☐4 ☐5
		Mentors will evaluate whether the team: Designs a simple, intuitive, and user-friendly interface. Maintains consistency in screens and user flow. Distributes tasks effectively among all team members. Demonstrates active collaboration and communication. Incorporates mentor feedback into the solution.	
ELIMINATION HERE : TOP TEAMS WILL REACH FINAL PITCHING ROUND			
Stage 4 - Final Pitch & Demo Review	3.00pm - 5.00pm	Presentation & Demo	☐1 ☐2 ☐3 ☐4 ☐5
		Mentors and judges will evaluate whether the team: Clearly explains the problem and proposed solution. Demonstrates the working prototype confidently. Highlights innovation and real-world impact. Explains the technical implementation and architecture. Answers questions confidently and discusses future enhancements.	

General Rules

- Every team must adhere to the allotted time.
- Teams may use open-source libraries and APIs.
- AI tools (ChatGPT, Claude, Gemini, GitHub Copilot, etc.) are allowed, but participants must understand and explain the generated code.
- Internet access is permitted only for research, documentation, and development.

-
- Plagiarism or copying another team's solution will result in disqualification.
 - All work should be completed during the hackathon.
 - Decisions made by mentors and judges are final.

Prize Pool – ₹2,00,000

To encourage innovation, technical excellence, and participation from a larger number of teams, prizes will be distributed across multiple award categories.

Award Category	Prize Amount
Winner	₹60,000
Runner-up	₹40,000
Second Runner-up	₹25,000
Best Innovation Award	₹15,000
Best Business Idea	₹10,000
Best Technical Implementation	₹10,000
Best UI/UX Design	₹10,000
Best AI/GenAI Solution	₹10,000
Best Female-Led Team	₹10,000
Best Emerging Team (<i>First-Year / Freshers</i>)	₹10,000
Total Prize Pool	₹2,00,000

Special Recognition Awards (Certificates Only)

In addition to the cash prizes, certificates of excellence may be presented for:

- Best Social Impact Solution
- Best Healthcare Innovation
- Best Agriculture Solution
- Best Education Technology Solution
- Jury's Choice Award

Note: Award categories may be revised based on the number of participating teams and the quality of submissions. The decision of the jury and organizing committee will be final.

Think big, innovate boldly, and build solutions that create real-world impact. Collaborate effectively, embrace mentor feedback, and make the most of this opportunity to learn and grow.

Wishing all participants a successful and inspiring Hackathon!

Innovate • Build • Collaborate • Transform
